

## Patient Specific (Disposable) Slings w/loops or clips

*PPL Transferring Patients.....Not Infections*

- Patient Specific or disposable slings have increased in popularity. We have (by far) the largest range of disposable slings in North America. The slings are available w/Loops or with Keyhole Opening Clips to accommodate most lifts on the market.
- All disposable slings come with “WASH INDICATORS” to alert staff that the sling has been washed!
- Disposable slings can be “Spot Cleaned” and have a “Cloth Type” feel that is more comfortable for most patients.
- We have 1000 lb. Fullback Patient Specific (Disposable) slings with Headrest and Divided Legs.
- Because we offer a wide variety of Patient Specific (Disposable) sling configurations, your infection control department will not be limited by availability or style.
- No more lost slings.
- No waiting for slings to be cleaned and returned by laundry services. You will always have a new sling **READY WHEN NEEDED!**
