SLING TYPES:

(Disposables shown)

Universal Deluxe
 Similar to the Universal but with single loops and greater head support.

UNIVERSAL
 Easy to fit yet very supportive. Most popular sling for general transfer purposes. Available with clips or multiple loops.

CLIP UNIVERSAL
 Universal Clip is similar to our regular universal but with longer legs similar to the main clip slings on the market.

❖ High Weight Lifting Capacities for Bariatric Population

SIT-TO-STAND
 Ideal for toileting seating/standing or general rehabilitation.

CLIP SIT-TO-STAND
 Ideal for toileting seating/standing or general rehabilitation for lifts with clip style attachments.

REPOSITIONING
 Used for repositioning and lateral transfers. The material is breathable micro mesh or cotton to be used 24/7.

REPO SINGLE LOOP
 Same cotton or micro mesh fabric but with single loop to be used 24/7.

BARIATRIC
 Designed to comfortably support bariatric patients without increased pressure on their legs.

LIMB SLING
 Available in standard and bariatric sizes with ample padding. Designed for holding a patient's limb for dressing changes.

WALKING PANTS
 Available in two configurations. Designed to help ambulate individuals weighing up to 1100 lbs.

WALKING SLING
 These slings are designed for early ambulation, rehabilitation or for any patients who have difficulty walking.

RETURN BELT
 The Return Belt is used with the return lift, as well as for transfers and gait training.

TURNING SLING
 These slings are used for turning a patient into a lateral resting position.

HYGIENE
 The large opening around the seat facilitates undressing. Safe to use when wet.

These are not new products we have several very satisfied clients saving hundreds of dollars while still providing safety and security for their Residents/Patients.
