

Halo Disinfection System®

The Most Effective and Affordable **Whole Room Disinfection Solution for Surgical Centers**

Surgical centers are high-stakes environments for effective disinfection. When it comes to the efficacy of your whole room disinfection strategy, there's no room for compromise. At the same time, your whole room disinfection system must be able to achieve results at a cost you can afford without disrupting your rigorous day-to-day workflows.

The Halo Disinfection System® is EPA-validated to **kill 99.9999% of *C. difficile* spores** and ensures a uniform kill rate throughout every room. **The sporicidal system pairs this industry-leading efficacy with low costs of ownership and operation to deliver the greatest value in whole room disinfection on the market today.**

Halosil's Five Star, Six Log Approach to Fighting HAls.

- ★ **Efficacy:** Kills 99.9999% of resistant *C. difficile* spores, even in areas beyond human or UV reach.
- ★ **Affordability:** Reduces operating costs with a maintenance-free design and affordable formula.
- ★ **Safety:** Safely decomposes into water, oxygen and non-toxic silver complexes.
- ★ **Flexibility:** Flexibly disinfects diverse spaces and spaces throughout the surgical center.
- ★ **Usability:** Empowers staff with intuitive operator controls and a simple, no rinse or wipe formula.

Halo Disinfection System®

The Dry Fogging Technology Redefining Whole Room Disinfection for Surgical Centers

The Formula

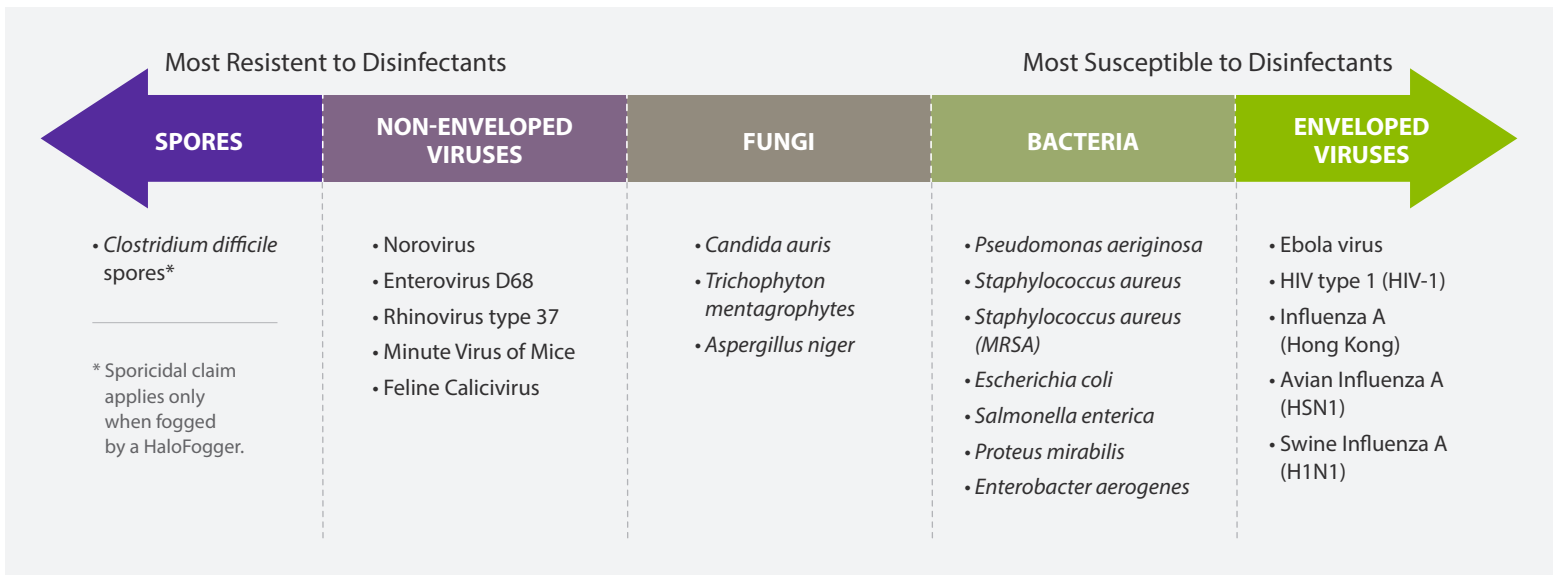

Using hydrogen peroxide and minute traces of silver ions, Halosil's proprietary **HaloMist™** formula applies two mechanisms of killing action to destroy a broad spectrum of microorganisms and provide antimicrobial qualities for maximum impact.

The Delivery

The **HaloFogger®** generates a turbulent aerosol that uses evaporation to ensure the uniform delivery of HaloMist™ throughout complex rooms—even in areas beyond the reach of humans and UV lights. HaloFogger's exceptionally dry aerosol is safe for use around delicate electronic surgical equipment.

The Results

The **Halo Disinfection System®** is EPA-validated to destroy a diverse range of spores, bacteria, fungi and viruses. Specific kill claims can be found below.

One System for Your Diverse Disinfection Needs

Halosil delivers three distinct HaloFogger® models, each suited to disinfect the many spaces and places found in your surgical center.

HaloFogger®

The HaloFogger delivers complete surface disinfection throughout complex spaces with the simple touch of a button, delivering a precise amount of disinfectant based on room size.

HaloFogger® FLX

The HaloFogger FLX provides the same efficacy and precision of the standard HaloFogger, with added flexibility in positioning of the nozzle to disinfect multiple operating rooms in rapid succession.

HaloFogger® EXT

The multi-purpose HaloFogger EXT provides the same flexible nozzle positioning capability as the FLX, with lower fluid output to treat a wide range of smaller spaces.
