BEST FOR LESS

MESH

POLYWEAVE

PADDED

WIPEABLE

PARACHUTE

DURAWEAVE

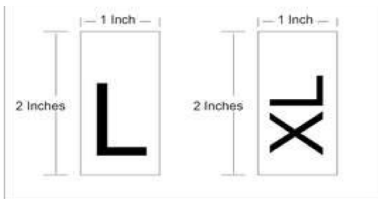

QUILTED

Inovi provides a simple and cost effective way to keep both patients and caregivers safe while still managing costs. By utilizing an advanced polywoven fabric, Inovi's reusable slings offer superior durability and comfort.

This will result in slings lasting longer, being more comfortable and costing less up front and over time. With 200 plus dedicated sling sewers, we can also make changes and customize very quickly and responsively.

FULL RANGE

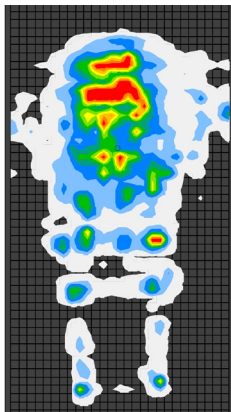

Inovi offers a complete sling portfolio including pediatric and bariatric solutions. Each sling is individually serialized and includes easily identifiable color-coded border for easy sizing plus a very visible additional size indicator on reusable slings.

SAFE FOR BATHING

Slings can be spot cleaned or fully submerged during bathing and can still be used if allowed to air dry. This prolongs the use of the sling and reduces replacement cost.

PRESSURE MAPPING STUDY

Over 10,000,000 slings sold worldwide. All slings are manufactured in accordance with ISO standards. Breathability, pressure mapping and flammability studies have been completed on all slings. Inovi adheres to the highest quality production standards and batch tests all of its slings via an independent testing laboratory.

UNIVERSAL APPLICATION

All of Inovi's slings are available in either loop or clip configurations and are compatible with all manufacturers' lifts.

SLING TYPES

UNIVERSAL

Easy to fit and very supportive. Split leg design with multi-loop straps and with head support.

UNIVERSAL DELUXE

The universal deluxe provides greater head support and has a single loop strap.

UNIVERSAL CLIP

Compatible with lifts using clip style attachments. Available in multiple configurations.

MESH

Breathable mesh material is ideal for bathing. Available with or without head support.

EASY FIT

Parachute material reduces friction while placing sling. Available with or without head support.

COMFORT

Designed to be left under the patient, spacer material wicks moisture & allows increased air flow.

DURAWEAWE

This fabric offers all of the benefits of polyester but with a more textured feel.

BARIATRIC

Designed to comfortably support bariatric patients without increased pressure on their legs.

REPOSITIONING

Used for repositioning and lateral transfers. The material is breathable mesh (or solid).

HYGIENE

The large opening around the seat facilitates undressing. Available with belt and detachable head support options.

HAMMOCK

Hammock Sling with Loops, Hammock Mesh Sling with Commode Aperture.

AMPUTEES

This sling is suitable for both bilateral or unilateral amputee patients.

SIT-TO-STAND

Ideal for toileting seating/standing or general rehabilitation. Available with loop or clip attachments.

WALKING PANTS

Available in two configurations. Designed to help ambulate individuals weighing up to 1100 lbs.

LIMB LIFTER

Used to hold arms, legs and other parts of the body for tasks such as washing, debriding, or treatment.

RETURN BELT

The Return Belt is used with the return lift, as well as for transfers and gait training.
