

transforming the shower experience  
protecting the caregiver.

25 years ago

## An example of change

This paradigm change happened due to:

- Improved features
- Ease of use
- Safety
- Staff acceptance
- Proven reduction of injuries

By the late 1990's

The change in lifts happened regardless of the fact price was **5X** previous cost.

## The same transformation is now occurring with showering

The benefits of Lopital height-adjustable over conventional PVC showering include:

- Ease of use during the showering process
- Easier to clean
- Durability of metal construction
- Resident safety
- Caregiver safety

Long Term Care facilities use height-adjustable equipment already

- ✓ Beds
- ✓ Physical Therapy tables
- ✓ Beauty shop
- ✓ Lift chairs

**It's time for Shower Chairs**

## How these solutions can help your organization.

### Lopital's design assists caregivers and facilities as they address the Requirements of Participation.

Guidelines include:

- **Quality of Life:** depth of Lopital product line allows 'accommodation of needs'
- **Quality of Care:** toileting function helps minimize incontinence
- **Person Centered Care:** Lopital addresses all levels of care
- **QAPI:** Lopital will improve outcomes in the hygiene area and Infection Prevention
- **Residents Rights:** have access to quality hygiene care regardless of condition/acuity
- **Infection Prevention:** Lopital products make disinfection much easier
- **Training Requirements:** intuitive design of Lopital products insures heavy use
- **Physical environment:** conducive to ADL's and mobility

### Expansion of Safe Patient Handling to hygiene area

- Improved ergonomics
- Safer for resident
- Easy to use
- Reduced injuries to staff

Lopital is the showering solution needed to address this higher accountability of care.

"A paradigm shift that integrates safe patient handling into the shower"
