SINA Comfort

The universal shower trolley for hospitals, care and nursing homes

SINA Comfort shower trolley

The best solution for safe and comfortable showering ...

BEKA Hospitec has worked with internationally known designers to develop new, innovative bathing lifts and shower solutions providing optimal working conditions for nursing staff and enhancing the well-being and safety of your residents ...

The ideal device for people who need a high level of care

With the increasing number of people who need a high level of care, the demand for adequate devices providing dignified care and personal hygiene also increases. People who, due to their condition, cannot be cared for with the usual devices like bathing and shower lifts, have to be washed in the bed. Often this does not meet the demand for a dignified personal hygiene.

The SINA shower trolley offers the ideal way of giving the resident a safe, comfortable and dignified shower. The transfer from bed to shower trolley takes place by moving it sideways to the bed and using a transfer aid to move onto the shower trolley.

Highest safety and comfort

The comfortable padded shower mattress offers a pleasant surface where the resident lies safely and easily. The high siderails provide protection against rolling off from the shower trolley.

The maintenance-free metal siderail hinges have been designed to withstand extreme weight and offer dependable safety for the residents and the staff. Electrical or hydraulic height adjustment options allow the trolley to be adjusted to an ideal working height and thus provide for a stress-free shower.

The highest quality and comfort

Providing the best nursing and care conditions ...

The SINA Comfort shower trolley meets the highest standards for quality and reliability. It is wide range of uses in the bathroom, can be adjusted to the optimal working height and is easy and safe to operate ...

Comprehensive safety concept

The shower trolley impresses you with its extreme sturdiness and stability, achieved by a scissor-system which supports the bed surface from both ends and ensures a stable surface right up to edges. The total of eight double castors, with rocker-suspension, provide for comfortable and easy transport for the resident as well as for the staff.

Shower trolley fits easily in any standard bathroom

The dimensions of our shower trolley are chosen to allow it to fit in any standard nursing bathroom. It can be used either with an extended shower hose from the shower or with a shower console. The water can drain either into the toilet or with a drainage hose to the waste-trap of the shower, and the bed can quickly be lowered for easier draining.

Trendelenburg and reverse Trendelenburg

The stretcher offers easy adjustment for Trendelenburg and reverse Trendelenburg positions. This way fast assistance is possible until medical care takes place in case of an acute hypotension.

Electric or hydraulic height adjustment

The SINA Comfort shower trolley is available with electric or hydraulic height adjustment, enabling easy adjustment to the working height of the nurse.

All metal parts of our shower trolley are made out of stainless steel and additionally powder-coated, meeting the demanding quality which is so especially important in wet rooms. The color-coating also gives a pleasant, modern design and appearance.

The transfer from bed to shower trolley takes place by moving it sideways to the bed. The resident can then be easily repositioned onto the shower trolley.

The dimensions of our shower trolley are chosen to allow it to fit in any standard nursing bathroom, to be used in combination with a shower console or a shower.

The SINA Comfort shower trolley can be used in a variety of ways, offering your resident optimal personal hygiene anytime ...

Use in long term care homes and multi-user environments

Here especially one finds a broad spectrum of different demands and degrees of disability, which do not allow the use of the usual shower and hygiene solutions. The SINA Comfort in many cases offers here a safe, convenient route to dignified and effective personal hygiene.

Due to its very high stability the SINA shower trolley is also universally used in many facilities as a mobile changing table. This allows one space-saving device to provide changing and care possibilities as well as an excellent shower solution.

Our version in XXL for special care

A XXL-version rounds up our shower trolley program. An extra wide stretcher and extra-high siderails give even heavyweight patients enough space and safety. Here especially our extremely stable design proves its worth in combining comfort and safety.

By special customer request we can provide non-standard sizes on the XXL, to adapt the XXL shower trolley precisely to the given room concept.

Rocker suspension and extra-large castors provide for easy maneuvering even in the XXL-version.

The best solution

For your nursing staff and your residents ...

The SINA Comfort shower trolley perfectly combines safety and comfort for your residents and for your nursing staff ...

Key benefits for your nursing staff

- Very safe and stable shower solution
