Positioning Change on Beka AVERO Motion Tub Air-Jets

JUNE 5, 2018

HANDICARE (FORMERLY PRISM MEDICAL) IS ANNOUNCING A POSITIONING CHANGE TO THE AIR-JETS ON THE BEKA AVERO MOTION BATH TUBS.

Beka AVERO Motion Bath Tubs are made available with an optional air-jet whirlpool system, providing a gentle bubbling action on the skin as well as a stronger cleaning and stimulating action. The overall effect is pleasing for the patient and provides a calm, relaxing bathing experience.

All future Beka AVERO Motion Bath Tubs that are ordered with the air-jet whirlpool system will now arrive with a new arrangement of air-jets (as shown in Figure 1). The air-jets have been moved from the seat to optimize the effect of the the overall bathing experience. The re-positioning also provides the patient with a smoother, more comfortable seating surface, for easier entry and exit from the bath tub.

Should you have any questions regarding this or any other Handicare bulletins, please contact our Customer Service team at 1-877-304-5438 or info@prismmedical.com
